

Engineering Design Process

By: _____

ASK: What is the problem?

IMAGINE: Brainstorm ideas. What are solutions?

PLAN: Draw a diagram, make a list of materials, and create the steps.

A large, empty rounded rectangle intended for drawing a diagram or listing materials and steps.

CREATE: Follow your plan and make your creation.

IMPROVE: What works? What does not work? What could work better? Modify your design to make it better.
